Urban Extent. The Urban Extent of Tokyo in 2014 was 643,240 hectares, increasing at an average annual rate of 2.4% since 2000. The urban extent in 2000 was 463,890 hectares, increasing at an average annual rate of 1.1% since 1990, when its urban extent was 417,904 hectares.

Atlas of Urban Expansion - Tokyo

If Tokyo is evaluated as one of the most efficient, productive and sustainable mega-regions in the world, it is the result of rapid urban growth and development in the twentieth century. After that, Tokyo has been facing new challenges as it left the phase of rapid growth and entered the phase of no- or low-growth, depopulating and aging society.

Tokyo became a megacity by reinventing itself

Tokyo became the world's largest urban area by adding more than 20 million people between 1955 and 2000, adding more people than lived in any other urban area in the world during that period. Even with its now slow growth, Tokyo seems likely to remain number one for two decades or more.

The Evolving Urban Form: Tokyo | Newgeography.com

In 1995, 9.2% of Japan's total population was living in Tokyo, but that number has increased to 10.1% by 2015 in a span of merely 10 years. The reason for this increase is that a lot of people are drawn to Tokyo and its many entertainment facilities, the variety of events, and its status as a fashion hot
