'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters

who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Using such terms as science and technology, which have been relatively - cently adopted, to write about situations and events that occurred 2,500 years ago, may be a paradox. The Homeric Epics, the Iliad and the Odyssey, refer to the Mycenaean Era, a civilisation that ?ourished from the 16th to 12th c- tury BCE. The seeming paradox ceases to be one when modern specialists, searching through the ancients texts, discover knowledge and applications so advanced, that can be termed as scienti?c or technological in the modern sense of the words. The present book is based on extensive research performed by the author and his associates at the University of Patras, along with the presentations of other researchers at two international symposia, which he organized in 1 Ancient Olympia. It consists of ?ve parts, of which Part I is introductory, including such chapters as Homer and Homeric Epics, Troy and the mythological causes of the War, Achilles and his wrath, the siege and fall of Troy, Odysseus' long way home, the Trojan war and the cultural tradition, scienti?c knowledge in the Homeric Epics and ?nally an account on science and technology. Part II includes three chapters on applications of principles of natural s- ence, including chariot racing

and the laws of curvilinear motion, creep in wood and hydrodynamics of vortices and the gravitational sling.
