Feed the Soil – Not
the Plants. There's
a phrase that
frequently appears

File Type PDF

Feed The Soil

On the web – “Feed the Soil – Not the Plants” It sounds really good. I

mean, it's obvious. Plants grow in soil and so feeding the soil that will feed the plants makes sense. It's a bit new age green as well, which goes down well with the younger audiences.

You may have seen the phrase “feed the soil, not the plants” in many gardening books and website. It carries a lot of weight, and in this article we explain

File Type PDF

Feed The Soil

why and how to
feed your soil
ahead of (and
during) the growing
season. Soil
structure and
nutrition is
essential for
healthy crops.
Plants require
depth for their
roots, good
aeration, access to
nutrients and water

File Type PDF

Feed The Soil

– and all these things come from the soil.

Gardeners

Feed the Soil, Not the Plants - Rocket Gardens

In a natural, healthy soil lives a universe of critters eating and excreting. Bacteria eat fungi, fungi eat bacteria,
