*Fertigation Technology*

Fertigation is a fertilizer application method, in which dissolved fertilizers are delivered to the crop through the irrigation system. This technology provides the opportunity to apply precise rates of water and fertilizers to the crop, and therefore, if designed correctly, can be an important precision agriculture technology. Usually, concentrated fertilizer solutions are prepared in stock tanks, and

# Read Online Fertigation Technology

are then injected into the irrigation water, using fertilizer injectors.

*Fertigation as a precision agriculture technology / Cropaia*

Fertigation is commonly applied using both surface and pressurized irrigation application systems. When combined with an efficient irrigation system, both nutrients and water can be manipulated and managed to maximize marketable yield and nutrient efficiency ( New South Wales Dept of Primary Industries (NSW DPI), 2000 ).

*Advanced Greenhouse Fertigation System - The Fertigation ...*

Fertigation, as the name implies, is a process that combines fertilization and irrigation by injecting soil amendments, fertilizers, and other water-soluble products into an irrigation system. This method is especially common in horticulture and extensive agriculture. It is also used for landscaping due to the increasing reliability and simplicity of the dispenser unit.
