How to Identify Major Pivot Points for Forex Swing Trading. Major pivot points are easier to spot. They tend to form near support and resistance levels or they themselves create a new important level. These are points where buyers and sellers are very active. Minor pivots form more regularly and randomly. Look at the picture below. The Pros and Cons of Forex Swing Trading

[How to Identify Major Pivot Points in Forex Swing Trading](#)

Pivot points are calculated using the high, low and close prices of a previous day, week or month. Three different levels of support and resistance are calculated above and below the pivot point. The three levels of resistance are referred to as R1, R2, and R3 while the three levels of support are referred to as S1, S2, and S3.

Pivot points can be used by range, breakout, and trend traders. Range-bound forex traders will enter a buy order near identified levels of support and a sell order when the pair nears resistance. Pivot points also allow breakout forex traders to identify key levels that need to be broken for a move to qualify as a strong momentum move.
