Our hair is a reflection of our personality and style. While hair loss may not be a threat to our health, it can have devastating effects on self-image and well-being -- and it can be permanent if we don't take steps to treat it. Dr. Weaver's Black Hair Loss Guide introduces you to Seymour M. Weaver's Expert Care to Save Your Hair program, focusing particularly on conditions that are common among African Americans. You'll learn: how thinning hair can be an early sign of permanent baldness why a dermatologist is the best medical specialist to evaluate your hair loss how scalp disorders and hair loss are diagnosed how hair loss can be treated what to do if you get a bald spot and don't just cover it up

According to statistics, about 35 million men and 21 million women suffer from hair loss with the problem kicking in mostly from the age of 40 years, although many people still experience hair loss much earlier! Don't let hair loss damage your self-esteem when you can do something to reverse the situation! Losing hair can be psychologically challenging for many people, especially if that happens when you are still young. Well, let's be honest, none of us wants to have a bald head irrespective of how old we are. However, it is somewhat comforting to lose hair when a good percentage of your age mates are experiencing the same problem. You don't feel as if there is something wrong with you; it feels normal. If your hair loss does not feel normal and you want to keep your youthful demeanor for a few more years, then you want to make sure that hair loss does not become a menace. You do that by taking action at the earliest sign of receding hair. My search to deal with thinning hair and hair loss enabled me to come across several concoctions as well as fallacies about hair loss and cures for this problem.
