Oxford University Press is proud to publish the Oxford Case Histories, a series of peer-reviewed cases gathered from the Oxford Hospitals. Sample pilot exit exams have shown a strong bias towards case-based questions. Although 'student-centred learning' is encouraged, until now there are few books available to direct trainees preparing for exit examinations or wishing to undertake case-based learning as part of private study.

concise cases from the Oxford hospitals. Each case has associated questions on the differential diagnosis and aspects of management providing interactive learning material. Cases were chosen to illustrate specific issues of particular relevance to geratology, emphasizing the unusual or occult presentation of disease, the presence of multiple interacting pathologies, possibility for rapid deterioration, high incidence of complications of treatment, including adverse drug reactions and a need at times for difficult clinical decisions. Part of the Oxford Case Histories series, this book will be valuable reading for postgraduate trainees and consultants, and will be an essential resource for those preparing for exit examinations and revalidation. It is also the ideal tool for those who wish to improve their skills in diagnosis and management of a broad range of geriatric disorders.

In an ageing population, geriatric medicine has become central to general practice, and to emergency and general internal medicine in the hospital setting. Diseases are more common in the older person, and can be particularly difficult to assess and to treat effectively in a field that has limited evidence, yet makes up a substantial proportion of the work of most clinicians. Fully updated, this second edition of the Oxford Handbook of Geriatric Medicine includes all the information required to deliver effective geriatric care. Guidance is given on a range of key treatment areas, indicating where practice differs from that of younger adults or is ill informed by evidence, where dangers lurk for the inexperienced clinician, and on the many ethical and clinical dilemmas common in geriatric practice. This accessible handbook is essential reading for all junior doctors and specialist trainees in geriatric medicine and general internal medicine, and for all medical and nursing staff who manage older people.

Based around the core curriculum for specialist trainees, Oxford Case Histories in Rheumatology contains over 40 well-structured, peer-reviewed cases from the Oxford Hospitals, giving detailed coverage of the specialty, including diagnostic and management dilemmas. Each case comprises a brief clinical history and the relevant examination findings; details of investigations undertaken followed by questions on differential diagnosis and management; and detailed answers and discussion. The text is complimented by over 50 radiographic illustrations and an 8-page colour plate section. The question-and-answer format is designed to enhance the reader's diagnostic ability and clinical understanding. As part of the Oxford Case Histories series, this book is aimed at post-membership trainees and consultants and will be a useful resource for those preparing for exit examinations or revalidation. It will also be of interest to those who wish to improve their skills in diagnosis and management of a broad range of rheumatological disorders.

This book provides a case-based illustrative approach to the understanding and management of common and important sleep disorders, including snoring and sleep disordered breathing, insomnia and circadian-rhythm disorders, as well as primary neurological sleep disorders. Case histories are written by well-established experts from University College London Hospitals who have long-standing experience of providing a multi-disciplinary approach to the management of sleep disorders. Cases focus on the recognition of presenting features of sleep disorders and their clinical importance, using real life patients from sleep clinic. Each case report provides a detailed clinical description followed by a clear explanation of the salient points. The text is supported by photographs, diagrams and line drawing and concludes with a

Read Book Oxford Case Histories In Geriatric Medicine

list of key learning points. Each case history reads as stand-alone, although a common theme of presenting features, clinical features, investigation and treatment is adhered to. Cases are written in an easy-flowing prose style in an attempt to simulate the experience of seeing and discussing a real life patient case in clinical practice. The book is of interest to all clinicians who are likely to come across patients with sleep disorders in their clinical practice and wish to improve their understanding and knowledge of sleep disorders.

Part of the Oxford Case Histories series, this volume includes 65 neurosurgical cases covering core topics specified in the UK Neurosurgical Training Curriculum. Cases are drawn from the following clinical areas: trauma, vascular neurosurgery, tumours, spinal neurosurgery, hydrocephalus and paediatric neurosurgery, functional neurosurgery, and medical problems in neurosurgery. Revolving around actual patients and the relevant knowledge required in specific situations for decision making in clinical practice, this book will serve as an invaluable educational tool to help trainees, doctors, and practising neurosurgeons manage the a wide variety of clinical scenarios encountered in neurosurgery.

Over the past two decades there has been a marked change in global age demographics, with the number of over-60s increasing by 82% and the number of centenarians by 715%. This new-found longevity is testament to the success of recent advances in medicine, but poses significant challenges to multiple areas of health care concerning older patients. Building upon its predecessor's reputation as the definitive resource on the subject, this new edition of the Oxford Textbook of Geriatric Medicine offers a comprehensive and multinational examination of the field. Fully revised to reflect the current state of geriatric medicine, it examines the medical and scientific basis of clinical issues, as well as the ethical, legal, and socio-economic concerns for healthcare policy and systems. Over 170 chapters are broken up into 16 key sections, covering topics ranging from policy and key concepts through to infection, cancer, palliative medicine, and healthy ageing. New material includes focus on the evolving concepts of malnutrition, sarcopenia, frailty, and related geriatric syndromes and integration of geriatric principles from public health, primary and specialized care, and transitional stages from home to emergency, medicine and surgery, rehabilitation, and long term care. The Oxford Textbook of Geriatric Medicine brings together specialists from across the globe to provide every physician involved in the care of older patients with a comprehensive resource on all the clinical problems they are likely to encounter, as well as on related psychological, philosophical, and social issues.

This book provides an evidence-based guide for both trainees and consultants in geriatric medicine and those interested in geriatric medicine. Designed in line with the core Royal College curriculum, it provides a comprehensive and relevant guide to the issues seen in everyday geriatric medicine practice across the world.

Based around the curriculum for specialist trainees in respiratory medicine and designed for those preparing for exit exams, this book contains 44 well-structured, peer-reviewed cases gathered from the Oxford Hospitals, comprehensively covering the various disorders of the respiratory system. New developments in medical training at junior and registrar level have created a need for a collection of cases which enable self-assessment, directed at postgraduates. Each case comprises a brief clinical history and relevant examination findings, details of investigations, medical imaging followed by questions on differential diagnosis, and management and detailed answers and discussion.

Read Book Oxford Case Histories In Geriatric Medicine

Oxford Case Histories in Oncology contains 30 well-structured cases from clinical practice, giving a comprehensive coverage of the diagnostic and management dilemmas in oncology. The cases cover a wide spectrum of oncology including rare presentations and clinical problems of common cancers. Each case comprises a brief clinical history with relevant clinical examination findings. Questions are based on clinical investigations and aspects of management. Detailed answers are based on the best available evidence from the latest research, systematic reviews, meta-analysis and guidelines from national and international academic bodies. The text is complimented by over 50 illustrations, including radiographic images and radiotherapy treatment plans. The format of this book is thought provoking, and it helps to improve critical thinking and interpretative skills. It is a perfect self-assessment tool for oncology and palliative medicine trainees and consultants, and will be useful for those preparing for exit examinations in oncology. It will also be of interest to non-specialist readers who wish to improve their skills in the diagnosis and management of a broad range of cancers.
