It states: 'Palliative care is an approach that improves the quality of life of patients and their families facing the problem associated with life-threatening illness, through the prevention and relief of suffering by means of early identification and impeccable assessment and treatment of pain and other problems, physical, psychosocial and spiritual.'

"This 5th edition is an important achievement; it is a symbol of commitment to the field of palliative nursing, where we have been and where we are going." - Betty Rolling Ferrell, PhD, MA, FAAN, FPCN, CHPN
From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago. Based on the need to humanize rather than medicalize the illness experience for patients, this text delves into palliative care beyond the specific diseases affecting the patient. Instead, content focuses on the whole person and family.

Palliative patients struggle with chronic, debilitating, and painful conditions, and grapple with the fact that life as they knew it has already passed away. Families and friends reciprocally suffer, not knowing how to help and therefore become the secondary victims of the disease. This is not the challenge of a lone nurse, or a single physician, therapist, or social worker. Rather, palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience, continue to find meaning and purpose in life, and cure what can be cured. Palliative Care Nursing, Fifth Edition, delivers advanced empirical, aesthetic, ethical and personal knowledge. This new edition brings an increased focus on outcomes, benchmarking progress, and goals of care. It expounds upon the importance of the cross-disciplinary collaboration introduced in the previous edition. Every chapter in Sections I, II, and III includes content written by a non-nursing member of the interprofessional team. Based on best-evidence and clinical practice guidelines, this text presents comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and family. Each chapter contains compassionate, timely, appropriate, and cost-effective care for diverse populations across the illness trajectory. Key Features The expanded new edition offers current, comprehensive, one-

Palliative Care Nursing: Caring for Suffering Patients explores the concept of suffering as it relates to nursing practice. This text helps practicing nurses and students define and recognize various aspects of suffering across the life span and within various patient populations while providing guidance in alleviating suffering. In addition, it examines spiritual and ethical perspectives on suffering and discusses how witnessing suffering impacts nurses' ability to assume the professional role. Further, the authors discuss ways nurses as witnesses to suffering can optimize their own coping skills and facilitate personal growth. Rich in case studies, pictures, and reflections on nursing practice and life experiences, Palliative Care Nursing: Caring for Suffering Patients delves into key topics such as how to identify when a patient is suffering, whether

they are coping, sources of coping facades, what to do to ease suffering, and how to convey the extent of suffering to members of the healthcare team.

The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr. Betty Rolling Ferrell and Dr. Judith A. Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social, and spiritual needs pertinent to the successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care: from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with the intention of

uncertainty, bereavement care, the costs of caring, nurses' decision-making and capacity, and palliative care worldwide. The clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre-registration level, postgraduate level or as part of CPD study. With a foreword by last edition editor, Professor Sheila Payne, Lancaster University, UK. "I welcome this third edition of Palliative Care Nursing and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice. As the largest workforce in palliative care, and given the changing face of clinical practice for nurses, including increased educational opportunity and expanding roles and responsibilities, this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline. The learning exercises, in particular, offer tools for educators and clinicians to reflect on practice and understand new ways of knowing in palliative care. It will be an excellent resource for nursing, both in the UK and Ireland and to the wider international audience, having drawn on the breadth of global nursing expertise to bring this book together. Philip Larkin, Professor of Clinical Nursing (Palliative Care), University College Dublin and Our Lady's Hospice and Care Services,

Dublin, Ireland; President, European Association for Palliative Care “This is a book of substance that captures the current status of palliative nursing, including the values and research evidence that underpin it. The changing nature of palliative nursing as an evidence-based specialism is balanced with practical skills and insights from experts, and also considers the needs of those working with, or concerned about, the dying person’s well-being. It covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis. I hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing.” Professor Daniel Kelly, Fellow of the Royal College of Nursing and Royal College of Nursing Chair of Nursing Research, Cardiff University, UK

An on-the-go reference for hospice nurses and those interested in end-of-life care, this practical guide covers the essential elements in the compassionate and holistic care of terminally ill patients and their families. Nurses care for patients facing end-of-life issues in every practice specialty and, as the U.S. population continues to age, the need for proficiency in end-of-life skills will become increasingly important. *Fast Facts for the Hospice Nurse: A Concise Guide to End-of-Life Care* is an invaluable resource
