• Lower your risk of metabolic disorders, disease, and chronic weight gain • Protect yourself against the estrogenic substances in the environment, products, water, and food • Learn how certain foods and herbs can protect you! Estrogenic chemicals—known for causing the near extinction of various living species—are found in some of the most common foods we eat. In this revolutionary diet book, Ori Hofmekler addresses the millions of overweight and obese individuals who have failed or are disappointed with other diets—those who suffer from yoyo dieting, weight gain rebounds, or accumulation of stubborn fat in the belly and other estrogen-sensitive areas. Focusing on our current over-exposure to estrogenic chemicals in the environment, foods, and water, *The Anti-Estrogenic Diet* provides a practical solution to fat gain, estrogen-related disorders (PMS, endometriosis, fibrocystic disease), and increased risk of common cancers in women and men (breast, ovarian, cervical, prostate). Allowing you to still enjoy your favorite foods, the program is based on incorporating anti-estrogenic foods, spices, and herbs into your diet, while eliminating estrogenic foods and chemicals. Exposing dietary myths and fallacies, Hofmekler teaches readers that some foods commonly regarded as “healthy” may actually be harmful and vice versa. Special chapters dedicated to readers with different needs and health conditions, recipes, a question-and-answer section, and a list of scientific references are also included in this valuable resource.

Targeting readers with backgrounds in economics, *Intermediate Financial Theory, Third Edition* includes new material on the asset pricing implications of behavioral finance perspectives, recent developments in portfolio choice, derivatives-risk neutral pricing research, and implications of the 2008 financial crisis. Each chapter

concludes with questions, and for the first time a freely accessible website presents complementary and supplementary material for every chapter. Known for its rigor and intuition, Intermediate Financial Theory is perfect for those who need basic training in financial theory and those looking for a user-friendly introduction to advanced theory. Completely updated edition of classic textbook that fills a gap between MBA- and PhD-level texts Focuses on clear explanations of key concepts and requires limited mathematical prerequisites Online solutions manual available Updates include new structure emphasizing the distinction between the equilibrium and the arbitrage perspectives on valuation and pricing, and a new chapter on asset management for the long-term investor

When Tracey and Mandy first became pen pals, they never guessed that they would soon discover the darkest secrets of each other's troubled lives.

These proceedings are the third volume to be published in a series generated by the annual military history symposium sponsored by the US Army Training and Doctrine Command (TRADOC). Each year, these conferences bring together both military and civilian historians, as well as formal and informal students of military history, literally from around the world, for the purposes of presenting ideas and points of view on current military issues from a historical perspective. This year's symposium, hosted by the Combat Studies Institute, was held 2-4 August 2005 at Fort Leavenworth, Kansas. The 2005 symposium's theme was An Army at War: Change in the Midst of Conflict. As this title indicates, presentations at this event focused on how an Army changes while concurrently fighting a war. Changing an Army in peacetime is difficult enough. Transformation can include

changes to the personnel system, the turning in old and the fielding of new equipment, new training requirements, and at times, learning an entirely new way of viewing the enemy and the battle space in which operations will occur. Practical and cultural changes in an Army always cause tremendous turbulence and angst, both inside and outside of the Army. The United States Army and the nation are facing these challenges today, and they must make these changes not in a peacetime environment, but while fighting the Global War on Terrorism (GWOT). The panelists presented a series of topics addressing the current transformation challenge that ranged from maneuver warfare, to asymmetrical operations, to insurgencies, to logistics, to unit manning, to doctrine and many others. This third collection of proceedings contains the papers and presentations of participating panelists. It also includes transcriptions of the question and answer periods following the panelists' presentations. These annual symposiums are proving to be a key annual event for those students and masters of military history who believe that the past has something useful to provide in the analysis of current military problems.

Shhh! little mouse. Who is that sleeping? Will the little grey mouse find something to eat, or will he wake the sleeping cat? A delightful picture book for the very young from the best-selling, award-winning Pamela Allen
