Surgical Technique of the Abdominal Organ Procurement

As abdominal swelling decreases, the fascial edges are pulled closer together. The Wittmann patch is opened at least once every 24 to 36 hours for dressing changes, procedures, inspections, and reapproximations. When the two fascial edges are close enough, the remaining patch material is removed and the abdominal wall closed fascia-to-fascia.

...

The intention of this book
is to promote a surgical
technique of abdominal organ
procurement in order to
avoid organ damage and thus
enhance the quality of
retrieved organs. Organ
procurement from a brain
death donor is an essential
part of organ tra-
plantation.
