Tarantula (1955) - IMDb

Directed by Marielle Heller. With Tom Hanks, Matthew Rhys, Chris Cooper, Susan Kelechi Watson. Based on the true story of a real-life friendship between Fred Rogers and journalist Lloyd Vogel.

A Beautiful Day in the Neighborhood (2019) - IMDb

The name tarantula was originally given to the wolf spider, *Lycosa tarentula*, of southern Europe and was derived from the town of Taranto, Italy. The bite of *L. tarentula* was once thought to cause a disease known as tarantism, in which the victim wept and skipped about before going into a wild dance (see tarantella). It has been shown, however, that the bite of *L. tarentula* is not dangerous to ...

Tarantula | spider | Britannica

Tarantulas comprise a group of large and often "hairy" spiders of the family Theraphosidae (technically, spiders possess setae, not true hairs). Currently, about 1,000 species have been identified. The term tarantula is usually used to describe members of the family Theraphosidae, although many other members of the same infraorder (Mygalomorphae) are commonly referred to as "tarantulas" or ...

WORLD'S LARGEST TARANTULA! - YouTube

Most tarantulas stay hidden during the day and come out at night to eat. They feed mainly on insects but will also eat frogs and other small animals, such as mice, that come along. Some large South American tarantulas make webs to catch small birds to eat. Many tarantulas, however, hunt rather than spin webs to catch food.

tarantula - Kids | Britannica Kids | Homework Help

(Watch a tarantula shed its skin in a time-lapse video.) Scientists know very little about the new spider—including how it uses its horn—but they do know that *C. attonitifer* is a nocturnal ambush predator, sleeping during the day in the bottom of its burrow while spending nights at the entrance, waiting to pounce on insects and other prey.
